

# Sprint 1 Report

**Product Name:** Digital Task Management

**Team Name:** Binary Bits

## Team Members:

Steven Chou (Product Owner),  
Neeraj Mallampet,  
Edward Nguyen,  
Jason Shao,  
Simon Ho,  
Phillip Kwong,  
Bing Sun

*\*\*\*user stories and its respective tasks are listed in Sprint plan 1\*\*\**

## User Stories:

1. User Story 1 ( 100% ) .Completed
2. User Story 2 ( 60% ) Almost Done
3. User Story 3 ( 50% ) Almost Done
4. User Story 4 ( 0% ) Not Started
5. User Story 5 -----IDK

## Current Working Tasks: (add more if needed, add descriptions if needed)

1. **User Story 1, Task 1** - We have created a github repository for our eclipse project that everyone has access to.
2. **User Story 1, Task 2** - We have connected to the google app engine, which we plan on using to store our information. There are some faults with this, but we will delve more into this when we focus on storing information.
3. **User Story 1, Task 3** - We have a set up a maven skeleton for our project. This is basically a Makefile that automatically connects to the appropriate servlets.
4. **User Story 2, Task 1** - Our app, so far, lets the user create a project.
5. **User Story 3, Task 1** - Our app has basic appealing UI. For now, we are not that focused on the UI, more on the backend.
6. **User Story 5?**

### Tasks To Start Doing:

1. **User Story 2, Task 2** - This is a major part of the project. It allows users to create sub-tasks for the *parent* task. With this implemented, we will reach a major milestone for our project.
2. **User Story 3, Task 2** - This a crucial part of the UI implementation. With this accomplishment, we wish to make the app more interactive.
3. **User Story 5???**

### Tasks To Stop Doing:

1. **User Story 4, Task 1** - This has nothing to do with the backend or basic UI. Making this a priority this early will not help us in the long run. We decided to focus more on the backend and simple front end implementation first before we designing the company's logo.

### Sprint 1 Statistics:

**Total Hours: 10 + User Story 5**

**Total Story Points:** In the original plan, give them story points and then do them here

**Total Days Spent:** 7 days

**\*\*\*\*Ideal Work Hours/Day: Total Hours / 7 days**

**\*\*\*\*Ideal Story Points/Day: Total Story Points / 7 days**

### Do Burn UP Chart

**Make it meet 100 pt req.**

**Thanks.**
